Indian equity markets are expected to open sharply lower on Thursday, June 11, 2026, tracking GIFT Nifty at 23,056 — down approximately 123 points (−0.53%) from Wednesday's Nifty futures close — as the Iran-US conflict enters its most dangerous phase since the war began on February 28, with the ceasefire effectively dead and the Strait of Hormuz declared closed by Iran for the second time. The US launched Tomahawk cruise missile strikes against Iran on Tuesday evening after Trump confirmed that Iran shot down a US Army Apache helicopter near the Strait of Hormuz — US CENTCOM said strikes began at 5 PM ET as "self-defense" against Iran's drone attack on the helicopter, which had been operating over the Strait of Hormuz. In a second consecutive night of strikes on Wednesday, US CENTCOM completed "additional self-defense strikes against multiple targets" in Iran including Iranian military surveillance capabilities, communication systems and air defense sites — Hegseth had warned of a "busy night" before the strikes began. The IRGC Navy declared the Strait of Hormuz "closed until further notice" — Iran's most definitive closure statement since the war began. Trump posted on Truth Social: "Iran is all talk and no action. The Bully of the Middle East is DEAD!!! They've taken too long to negotiate a deal that would have been great for them, now they will have to pay the price!!!" — and told ABC News: "I believe the response should be very strong, very powerful." US CPI for May came in at 4.2% year-on-year — a fresh three-year high — while the Dow, S&P 500 and Nasdaq dropped over 0.4%. The 23,000 psychological floor — which has absorbed twelve consecutive intraday tests — faces its most severe test to date. "Zero new positions, maximum caution, strict stop-losses" is the only operative stance.

### Nifty 50 Performance

Wednesday's Nifty 50 opened at 23,233.95, touched a high of 23,425.35, a low of 23,184.60, and closed at 23,214.95 — down 27.15 points (−0.12%) — defending 23,200 on a closing basis in a tight consolidation session. GIFT Nifty at 23,056 signals a gap-down open of approximately 123 points — the index opens near 23,091, directly threatening the 23,000 psychological floor. RSI at 39–40 zone — approaching extreme oversold territory. MACD bearish crossover active with histogram re-expanding aggressively on the Apache helicopter downing news. A closing breach of 23,000 today would be the most catastrophic structural breakdown of the entire war cycle — opening 22,800 and re-testing the April 2 bear phase territory of 22,182 directly.

### Nifty Technical Levels

**Support: 23,000, 22,800, 22,500**

**Resistance: 23,300, 23,500, 23,700**

### Bank Nifty Performance

Wednesday's Bank Nifty opened at 55,110.50, hit a high of 55,555.85, a low of 55,026.15, and closed at 55,100.30 — down 94.20 points (−0.17%) — holding 55,000 on a closing basis despite profit-booking. GIFT Nifty at 23,056 puts Bank Nifty at risk of opening near 54,300–54,500 today — directly testing the 54,500 structural support. Hormuz declared "closed until further notice" alongside US CPI at 4.2% — a three-year high are the twin banking nightmares — crude surging back towards \$100 and rate hike fears combining to create the most adverse banking macro environment since early May. RSI at 55–57 zone — the sharp gap-down will drag this into 48–50 range. MACD bullish crossover under severe pressure.

### Bank Nifty Technical Levels

**Support: 54,500, 54,000, 53,500**

**Resistance: 55,000, 55,500, 56,000**

### **Stocks Fall as Iran Tensions Flare Up, Oil Gains**

Stocks dropped as Middle East tensions flared up with new US attacks on Iran, weighing on markets already grappling with a selloff in richly valued tech stocks. Oil climbed. MSCI's Asian equities gauge fell 0.7% after American forces launched strikes on multiple targets in Iran for a second straight day. The gauge briefly edged up as US military said it completed the strikes. The weak sentiment at the start of the Asian day stabilized with futures contracts for the Nasdaq 100 Index reversing earlier losses to rise as much as 0.6%. Brent crude rose 1.4% to around \$95 a barrel after climbing above \$95 at the start of Thursday's trading. Gold climbed almost 1% to \$4,110 an ounce. Treasuries were little changed after dropping Wednesday on bets the Federal Reserve will need to raise interest rates to counter inflation. The latest US strikes have injected more volatility into global financial markets and threaten to further crimp oil supplies. Even after Wednesday's softer-than-expected US inflation report offered a brief reprieve, traders continued to price in higher borrowing costs, while a continued selloff in semiconductor stocks cast doubt on the sustainability of the record equity rally

### **US Strikes Iran in Trump Escalation Over Stalled Peace Talks**

The American military launched strikes against "multiple" targets in Iran for the second straight day after President Donald Trump accused the country of dragging out talks on an interim peace deal. US Central Command said on X that it had begun "additional self-defense strikes" at 5:15 p.m. New York time on Wednesday. About four hours later, in another post, Centcom declared the operation complete and that military surveillance systems, air defense sites and communication systems were the targets. "US Marine Corps, Air Force, and Navy assets fired precision munitions on Iranian targets that posed a threat to US forces and international commercial ships transiting regional waters," Centcom said in the statement. Trump said in a Fox News interview he had spoken with top Iranian officials Wednesday and they had asked him to stop the bombing. He said it would stop shortly, but added the US would hit Iran again tomorrow if its leaders didn't sign an agreement, Fox News reported.
